Preview 1Q26F: Expect slim rise QoQ

PTT's 1Q26F net profit (out May 14) is expected to rise 3%QoQ to Bt26.3bn, backed by the gas business, from higher Gulf of Thailand supply and higher gas separation plant output. Greater contribution from E&P and P&R, supported by stronger oil prices, GRM and inventory gains, will be largely offset by sizable hedging losses and impairments. 2Q26F core profit should rebound QoQ, though inventory losses remain a downside risk. Maintain OUTPERFORM with a Bt44 TP, with valuation attractive at 0.9x PBV (2026F) and a 7% yield, backed by a resilient integrated model amid oil price volatility.

Gas business profit to improve QoQ. We expect gas to be the key earnings driver in 1Q26 from a 4% YoY and 7.9% QoQ rise in sales volume to 4,019 mmcf on higher demand in the power sector while price of imported LNG was pushed up by supply disruption caused by the closure of the Strait of Hormuz. GSP production was raised by higher domestic gas supply, which boosted utilization rate to a record high of 96.1% with a 14.4% YoY and 14.2% QoQ increase in output. GSP profit was also aided by a sharp 26.5% YoY and 20.3% QoQ drop in feedstock cost after the new gas pricing formula took effect in Jan.

Expect higher profit from P&R segment. Profit contribution from P&R associates is expected to grow QoQ, led by oil refining on higher GRM from stronger diesel and jet crack spreads and inventory gains. There will, however, be a partial offset from large hedging losses in the presence of rising refined product prices. Oil segment earnings should also improve QoQ, with mobility gross profit exceeding Bt1/liter on inventory gains and lower promotions. Oil sales volume is projected to rise 7% QoQ amid early panic buying linked to the Iran conflict.

Energy security response raises short-term financial strain but manageable. The energy security response raises short-term financial strain but this remains manageable. PTT outlined measures to secure Thailand's energy supply amid Middle East unrest and Strait of Hormuz disruption, including diversified crude sourcing (70% non-Middle East), average refinery utilization of 105%, and inventories above legal requirements. Government actions—price controls, export suspension, and full-capacity mandates—shifted energy-security costs to PTT, creating over Bt230bn in liquidity needs and -Bt7bn per year in financing costs. While this raises near-term leverage and policy risk concerns, management views the impact as temporary and non-recurring.

2Q26F outlook: higher oil price to drive earnings from E&P. We expect PTT's core profit to improve QoQ in 2Q26 on higher oil prices that will lift E&P earnings as sales volume from new assets rises and loadings increase. Oil retail marketing margin should normalize from the abnormally high 1Q26 level driven by stock gains, while demand may ease after early Iran war panic buying. Favorable GRM from middle distillates will support P&R earnings, though inventory loss risk remains.

Maintain TP of Bt44 based on SOTP. PTT still trades at an undemanding 0.9x 2026F PBV versus its 10-year average of 1.2x. Dividend yield remains attractive at >7%, supported by solid cash flow and a strong balance sheet. PTT has an outstanding track record of dividend payments. We maintain our SOTP TP at Bt44.

Key risks: Economic slowdown, oil price volatility, asset impairment, regulatory changes, and government intervention in retail oil pricing. ESG risks include environmental impact and transition to clean energy.

Value proposition

PTT's fully integrated model for its energy and petrochemical businesses protected its earnings during the oil price crashes in 2008, 2014-16 and 2020-21. This will be a key strength in the longer term amidst volatile oil price in 2026 given the ongoing war in the Middle East and the closure of the Strait of Hormuz. In addition, the persistent US tariff is likely to affect oil demand. The E&P business will remain PTT's key profit contributor, followed by gas and oil businesses. Its balance sheet has become increasingly solid after several asset impairments in past years to reflect low oil price. PTT has a strong balance sheet with 0.1-0.3x net D/E ratio for the next three years. This should cushion it from the adverse impact of volatile oil prices.

Business outlook

PTT's earnings over the next three years are expected to normalize as the energy cycle turns less supportive, although near-term conditions have tightened due to the Iran war, which has disrupted Middle East supply routes and lifted oil prices above US\$100/bbl following the effective closure of the Strait of Hormuz. PTT has implemented mitigation measures focused on energy security and cost control, including maintaining high crude and LNG inventories, diversifying feedstock and LNG sourcing, logistics rerouting, and price-risk management to contain margin volatility. Beyond the current geopolitical premium, upstream earnings should soften, while the gas value chain remains comparatively resilient. Refining is likely to stay cash-generative but volatile as GRM normalizes, and petrochemicals remain constrained by Asian oversupply, partly offset by improved feedstock flexibility. The key factors to watch include oil and LNG supply disruptions, inventory adequacy, GRM volatility, working-capital swings, and the sustainability of the geopolitical price premium.

Bullish views	Bearish views
1. PTT's business integration protects its earnings from the volatility of oil price.	1. Government intervention in reducing ex-refinery price of diesel to cap domestic retail price and alleviate the Oil Fuel Fund's burden will hurt PTT's earnings contribution from oil refining and increase the financial burden of the Group in the near term.
2. PTT's gas sales volume is expected to gradually increase in the medium term on higher electricity consumption as economic activities improve.	2. More threat from new players in the gas business upon liberalization of the industry, chiefly in terms of LNG imports.
3. Gas and LNG businesses remain structurally resilient, underpinned by Thailand's energy security needs amid global LNG tightness following disruptions to Qatari supply.	3. Unexciting earnings growth outlook

Key catalysts

Factor	Event	Impact	Comment
Oil price movement	The war in Iran and the closure of the Strait of Hormuz have disrupted flow of crude and refined oil products to global market, with Asia being the most affected region.	Positive/ Negative	PTT could benefit in the near term from elevated oil and LNG prices driven by Middle East supply disruptions and the effective closure of the Strait of Hormuz, which supports upstream earnings and inventory gains. The company's financial burden could increase from higher working capital needs and the Oil Fuel Fund receivables of its oil refining associates.
Slower global oil demand growth on fears of global economy	A deteriorating economic environment caused by the ongoing trade war, geopolitical tensions and more adoption of EV may erode oil demand. Slower recovery of China's economy also slows oil consumption growth.	Negative	IEA forecasts oil demand to contract by 80k bpd in 2026, as the Iran war upends the global outlook. This is a cut of 730k bpd from the previous projection as demand destruction will spread as scarcity and higher prices persist.
Near-term earnings outlook	1Q26F earnings momentum	Higher YoY and QoQ	We expect 1Q26F to improve YoY and QoQ on higher oil price lifting profit of E&P segment, more production of GSPs and higher GRM of oil refining business.

Sensitivity Analysis

Factor	Earnings impact	TP impact
EBITDA margin (+1%)	+5% (2026F)	+Bt0.2/share

Our view on ESG

We view that PTT provides concrete targets on environmental and social issues with a committed timeline and actual performance relative to its targets. We view its management and governance as satisfactory, reflecting management's expertise and experience in the business, with a diverse board of directors and transparency with stakeholders.

ESG Ratings and Indices

Bloomberg ESG Financial Materiality Score		CG Rating				
4.97 (2023)		DJBIC	SETESG	SET ESG Ratings		
Rank in Sector	9/62	PTT	5	Yes	Yes	AAA

Source: Thai Institute of Directors and SET

Environmental Issue (E)

- PTT aims at limiting PTT Group's greenhouse gas emissions, both scope 1 and scope 2. The long-term target of reducing emission 15% by 2030 compares to 2020 greenhouse gas emissions and achieving Carbon Neutrality by 2040 and Net Zero emissions by 2050 for PTT-owned operations. PTT group was able to achieve target in 2025 with CO₂ emission of 46.47mn tons vs. its ≤51mn tons target.
- PTT has outlined a shift in business model for the country's target industries, which includes investing in the future of energy, such as renewable energy, energy storage systems and electric vehicles.
- PTT also conducts research and studies in Carbon Capture and Storage (CCS) technology and is studying the feasibility of using carbon dioxide for commercial benefits in addition to compensation for greenhouse gas emissions within the PTT Group from reforestation by introducing one million rai of land for the Low Emission Support Scheme (LESS).

Social Issue (S)

- PTT is committed to driving Thailand through enhanced national energy security and economic growth in parallel with a better quality of life for society and communities. The company supports public policy in alleviating higher energy cost in Thailand.
- PTT's performance in safety management with KPI on safety and occupational health for employees and contractors met target with no lost time accidents in 2025 for employees.
- PTT's Human Capital Index for 2025 remains on track at 80%, achieving the target.
- Long-term consumer behavior on fossil fuel could impact PTT's oil and gas products but PTT has mitigated this risk via its investment in the power business via GPSC and in the EV supply chain, including battery pack assembly business in Thailand.

Governance Issue (G)

- PTT's board of directors consists of 15 directors, 2 non-executive directors (13.33% of the entire board), 12 independent directors, which exceeds half of the board (80% of the entire Board), and an executive director. These include three female members (20% of the entire Board).
- PTT was rated "5 star" (Excellent) by the Thai Institute of Directors.
- We view PTT's management and governance as satisfactory, reflecting management's expertise and experience in the oil and gas sector, its transparency with stakeholders, and its independent board of directors.

Explanations

Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of May 2, 2025) are categorised into: companies that have declared their intention to join CAC, and companies certified by CAC.
