Product and Service

Auto Finance

flagship product operates as a Shariah-compliant "sale-and-buyback" vehicle loan. The company buys the customer's vehicle in cash and instantly resells it to them via installments, providing immediate liquidity without requiring them to surrender the vehicle. Targeting individuals and small businesses in need of urgent working capital, this high-margin product is the most profitable segment in Amanah's portfolio.

Hire Purchase

offers Shariah-compliant used vehicle financing under the Ijarah Walgtina (lease-to-own) principle. The company retains ownership during the installment period and transfers the title to the customer upon full repayment. This product line includes three sub-categories.

Product	Description
Auto to Money	Liquidity-enhancement loan secured against vehicle title
Refinance	Portfolio transfer from competing financial institutions
Private Sale Financing	Peer-to-peer vehicle purchase financing without dealer intermediary

Complementing its core lending business, Amanah provides value-added services cross-sold to its existing borrower base, generating high-margin fee income at negligible incremental acquisition cost:

- Voluntary Motor Insurance – Renewal and placement of comprehensive vehicle insurance (Classes 1-3)
- Compulsory Motor Insurance (Por Ror Bor) – Statutory third-party liability insurance renewal
- Vehicle Registration Services – Title transfer, annual tax renewal, and related administrative services

Turnaround in Action: Collection Effectiveness Driving NPF Down

NPF (Non-Performing Financing/Loan) Based on the outstanding principal (Q2 2025-Q1 2026)

The initial decline in the NPF rate in September was driven by key debt collection acceleration measures, including: 1) increasing the budget to deploy outsourced collection agencies (OAs) for on-site collection, specifically targeting accounts 1-3 installments past due, with a requirement to collect more than one installment (Rollback) to prevent delinquency migration into NPF status; and 2) hiring specialized OAs with specific expertise in debt collection within the lower southern region."

Compares the Roll Back rate and the deterioration of loan class (Q2 2025-Q4 2025)
